

THE NEW TWINSTAR
S LINE III

NEW DESIGN. NEW CONCEPT.

The refined design features beautifully finished sharp and distinctive lines. It provided a challenge for our engineering and production lines but we persisted and brought our original design to reality.

We want our customers to be certain at first glance. This is a great light, that makes your aquarium stand out.

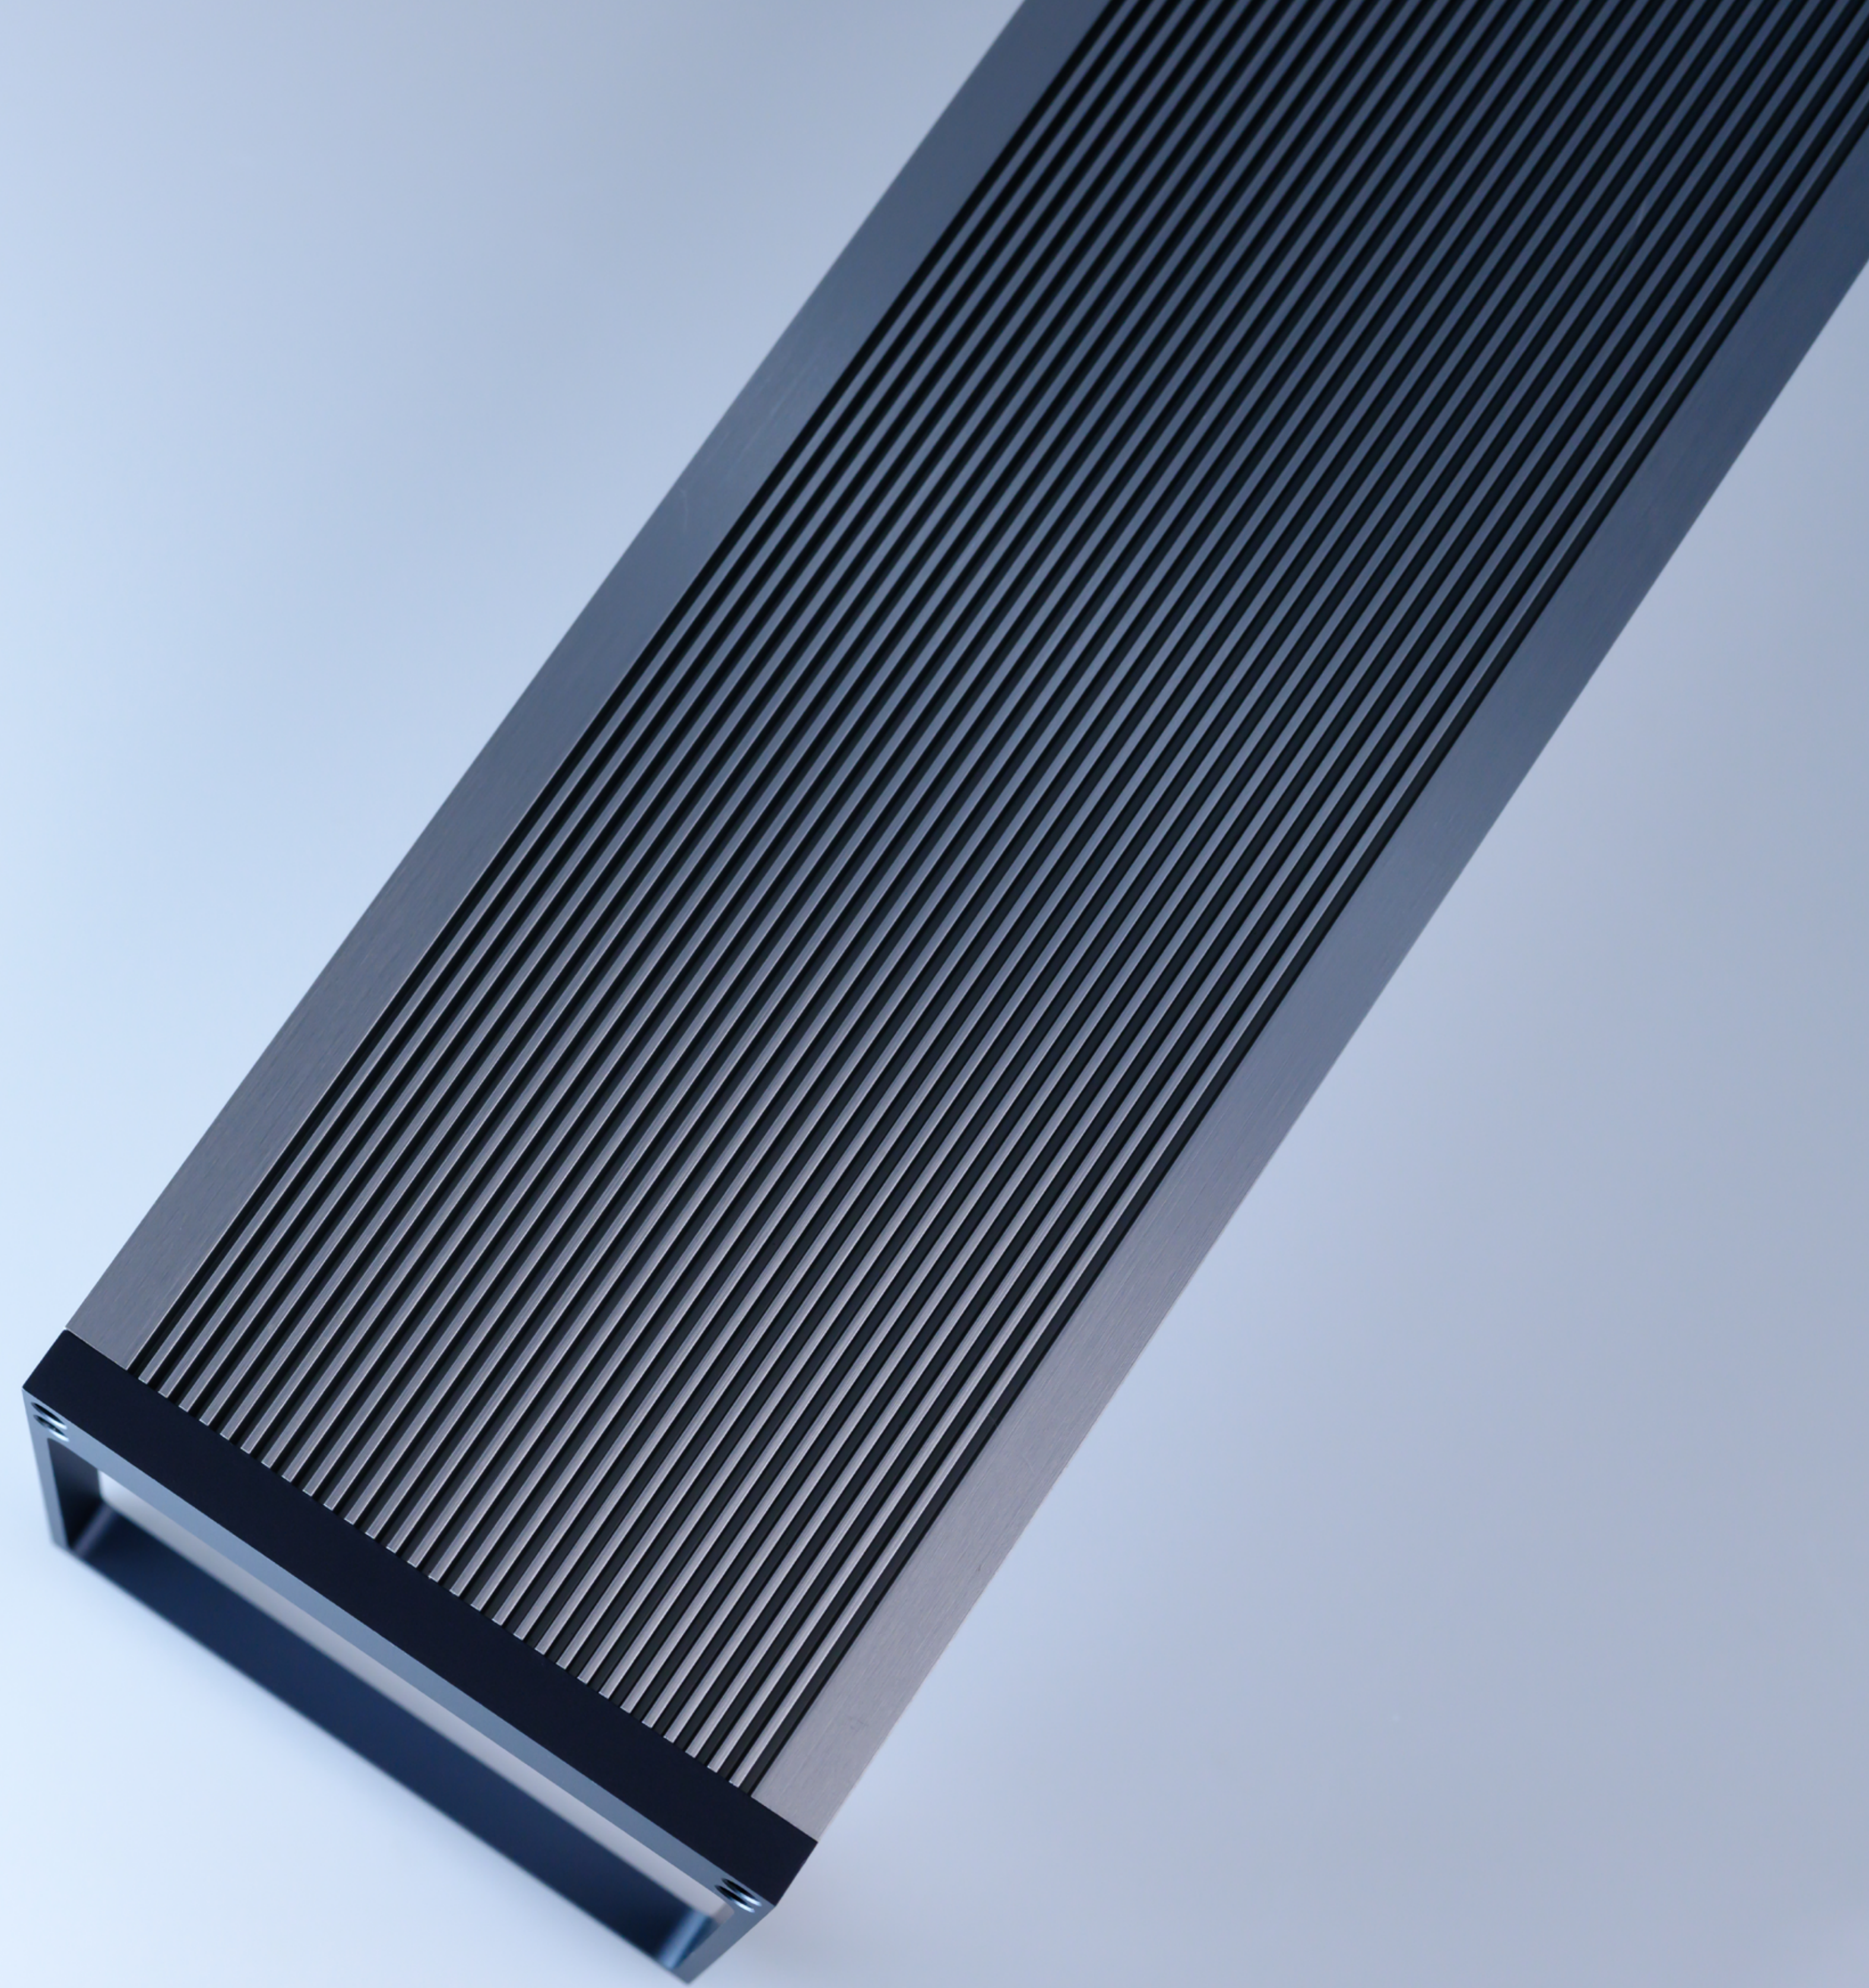

We want customers enjoy the one and only the NEW S LINE III.

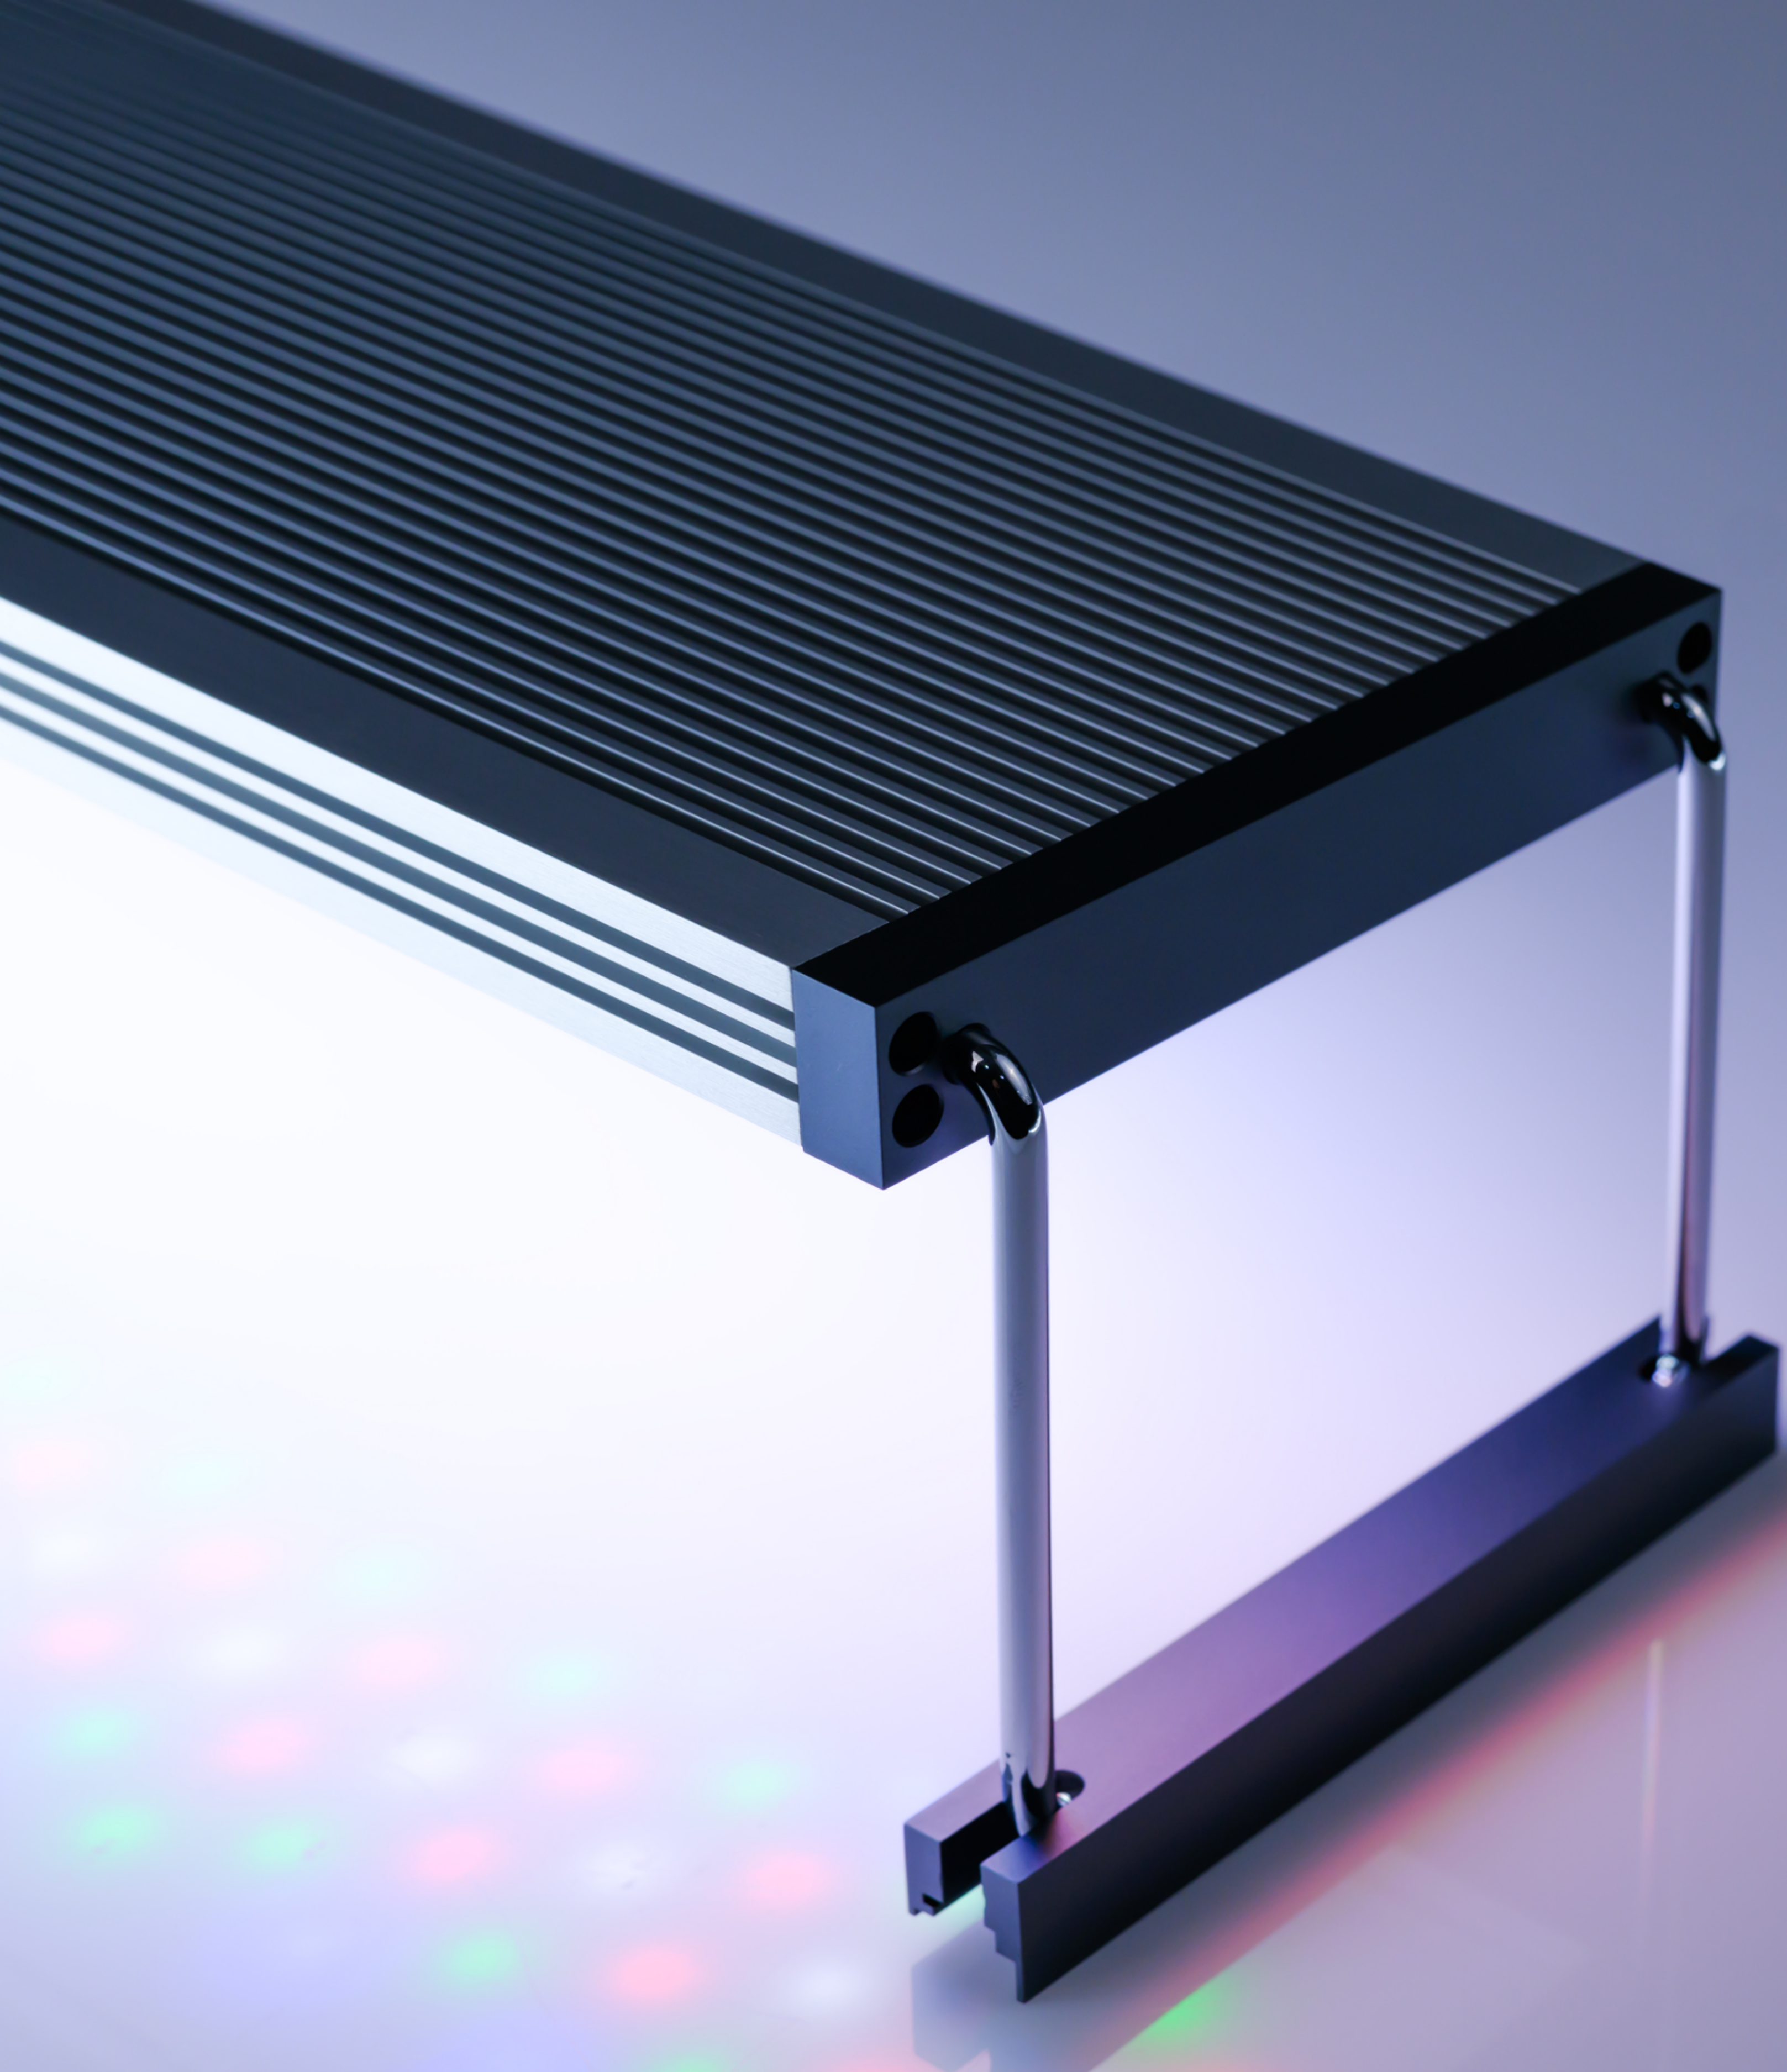

THE PERFECT PERFORMANCE AND DURABILITY.

To maximize the performance of RGB lamps with low efficiency, the high power required generates mass heat. We need a high degree of heat transfer engineering to develop innovative and creative heat dissipation systems with natural convection.

However, a top consideration was to keep the originality of design.

As a result, we were able to keep powerful brightness with original design in small sized durable products.

LED IN A WHOLE NEW LIGHT.

The NEW S LINE increases the RGB LED ratio bringing vivid colors in your plants and fishes.

600S VERSION II

100

Number of RGB LED

56

Number of white LED

600S VERSION III

126

Number of RGB LED

14

Number of white LED

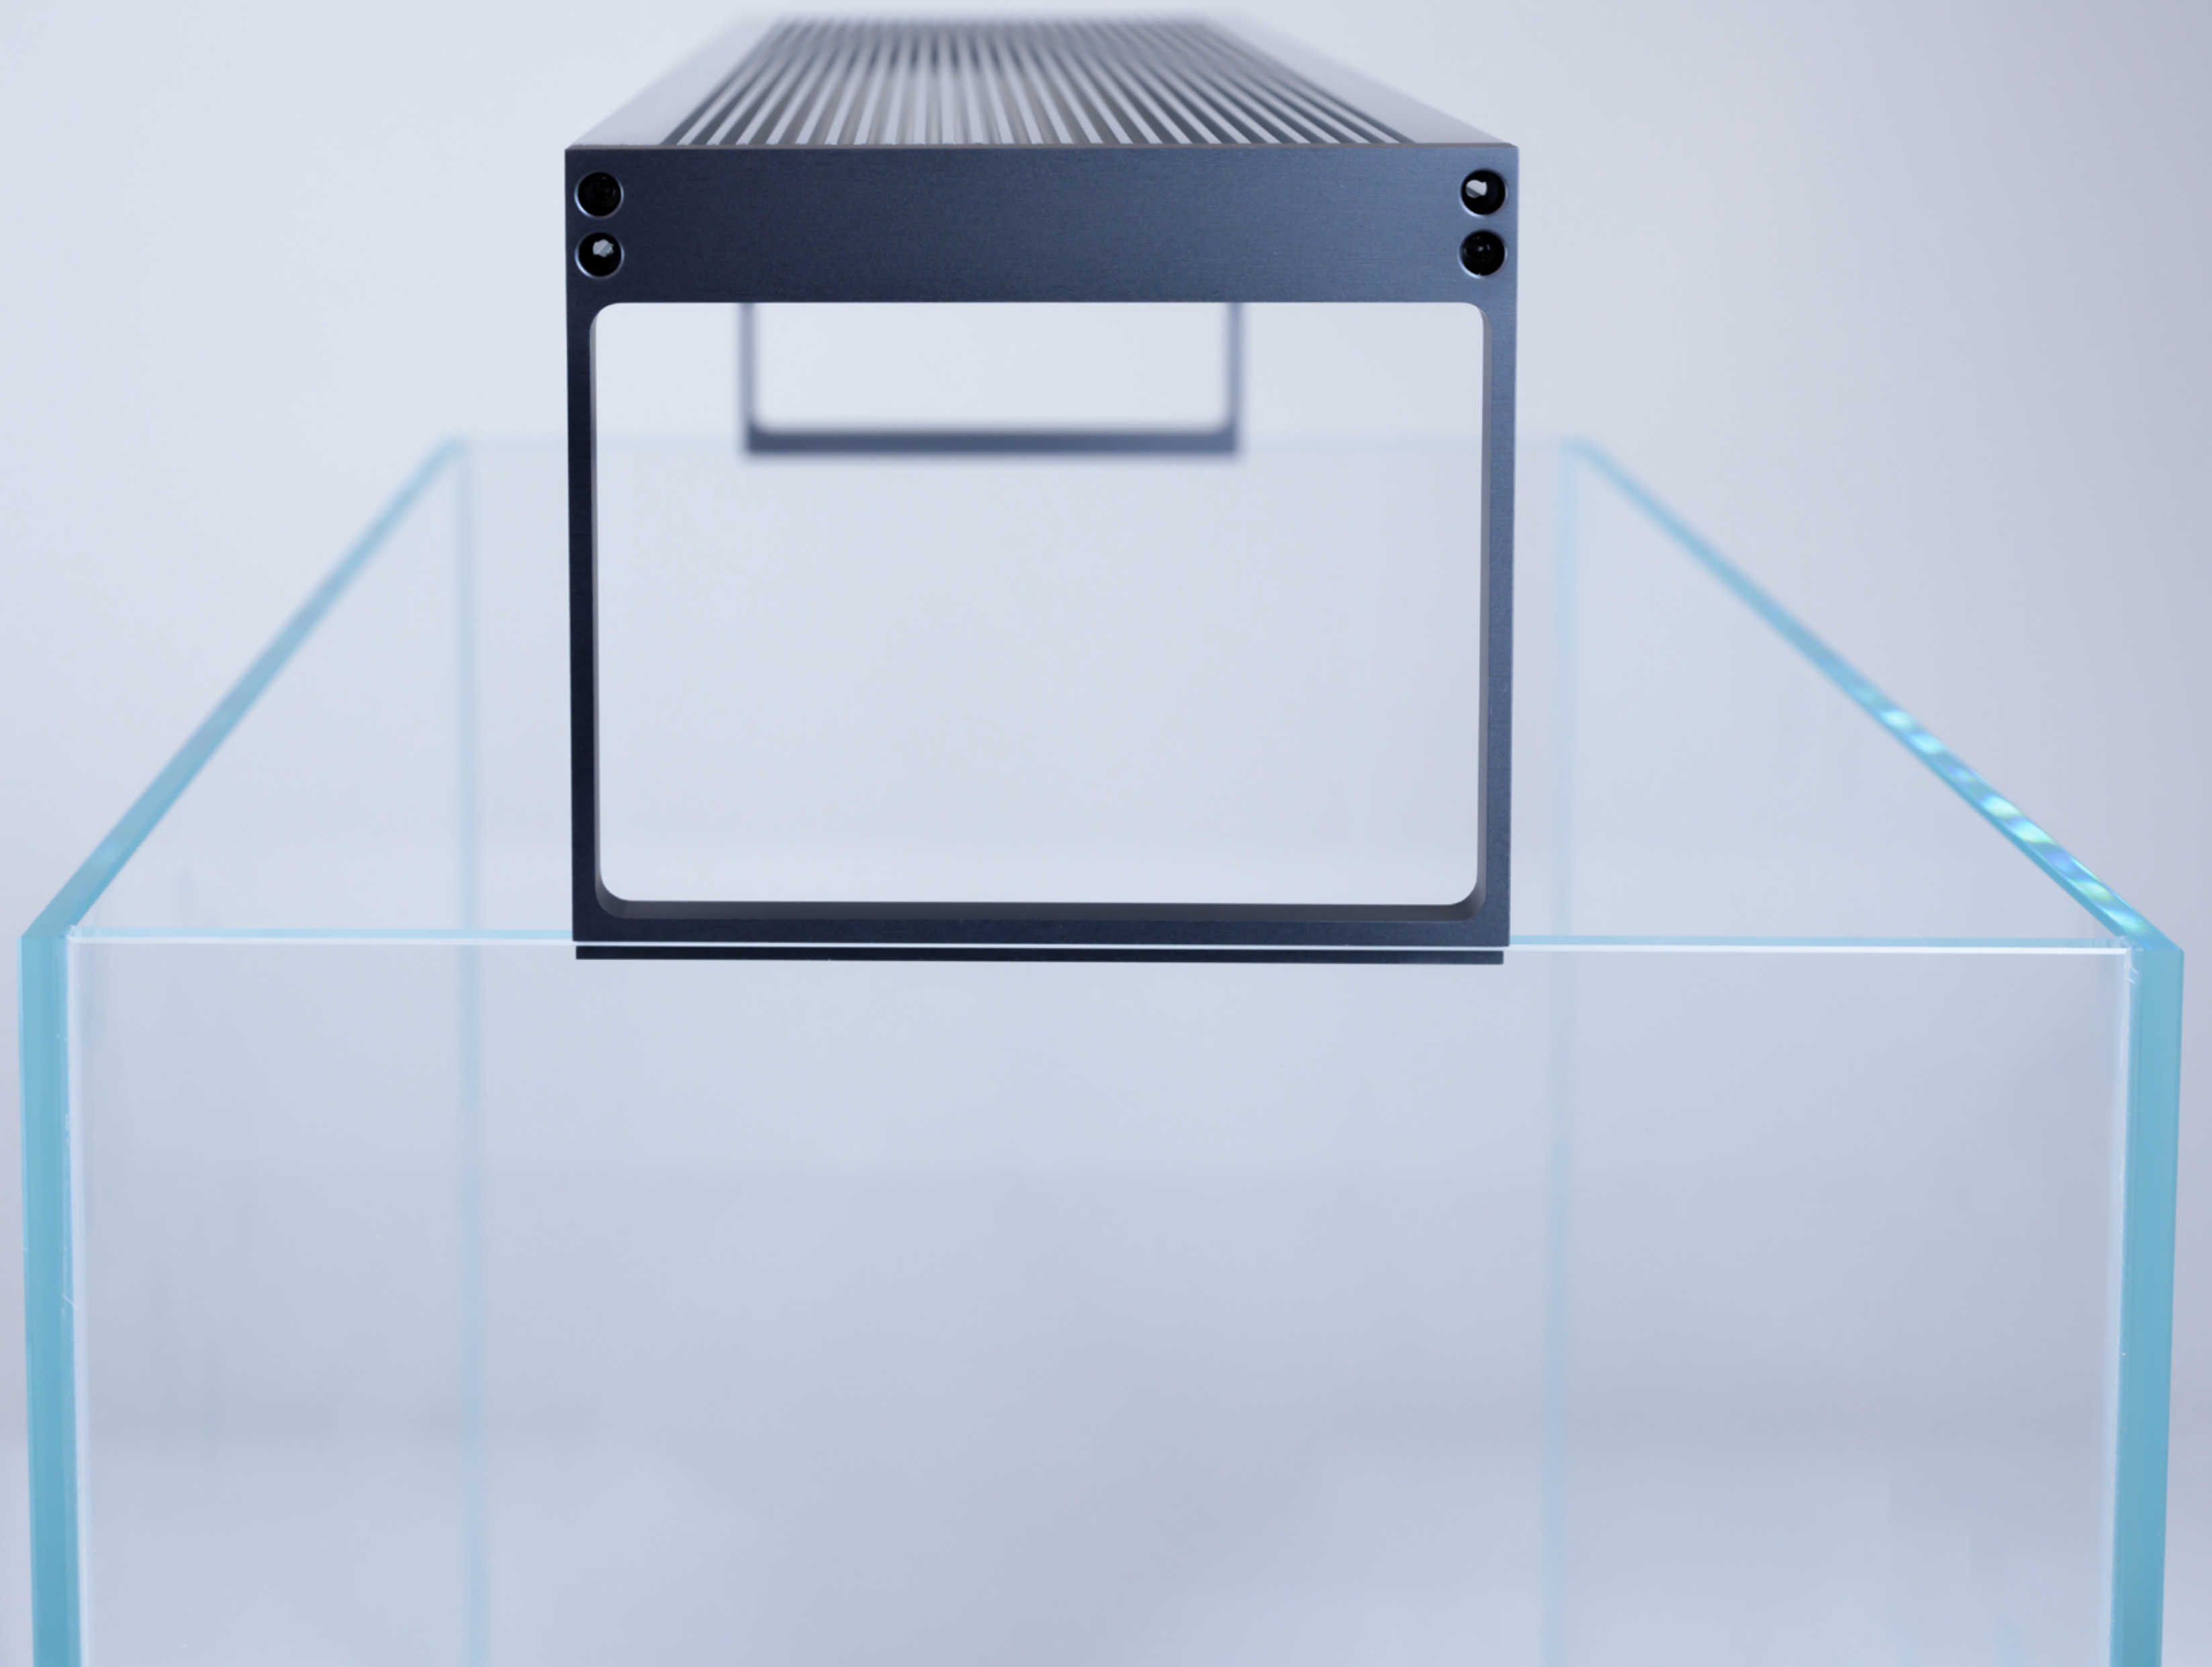

THE NEW SPECTRUM SHOWS THE TRUEST COLORS.

Professional aquascapers created the new spectrum
bringing out beautiful colors and optimal brightness.

HARMONIOUS DESIGN

It's not just a beautifully made light, but a completely new designed light to harmonize with nature aquariums.

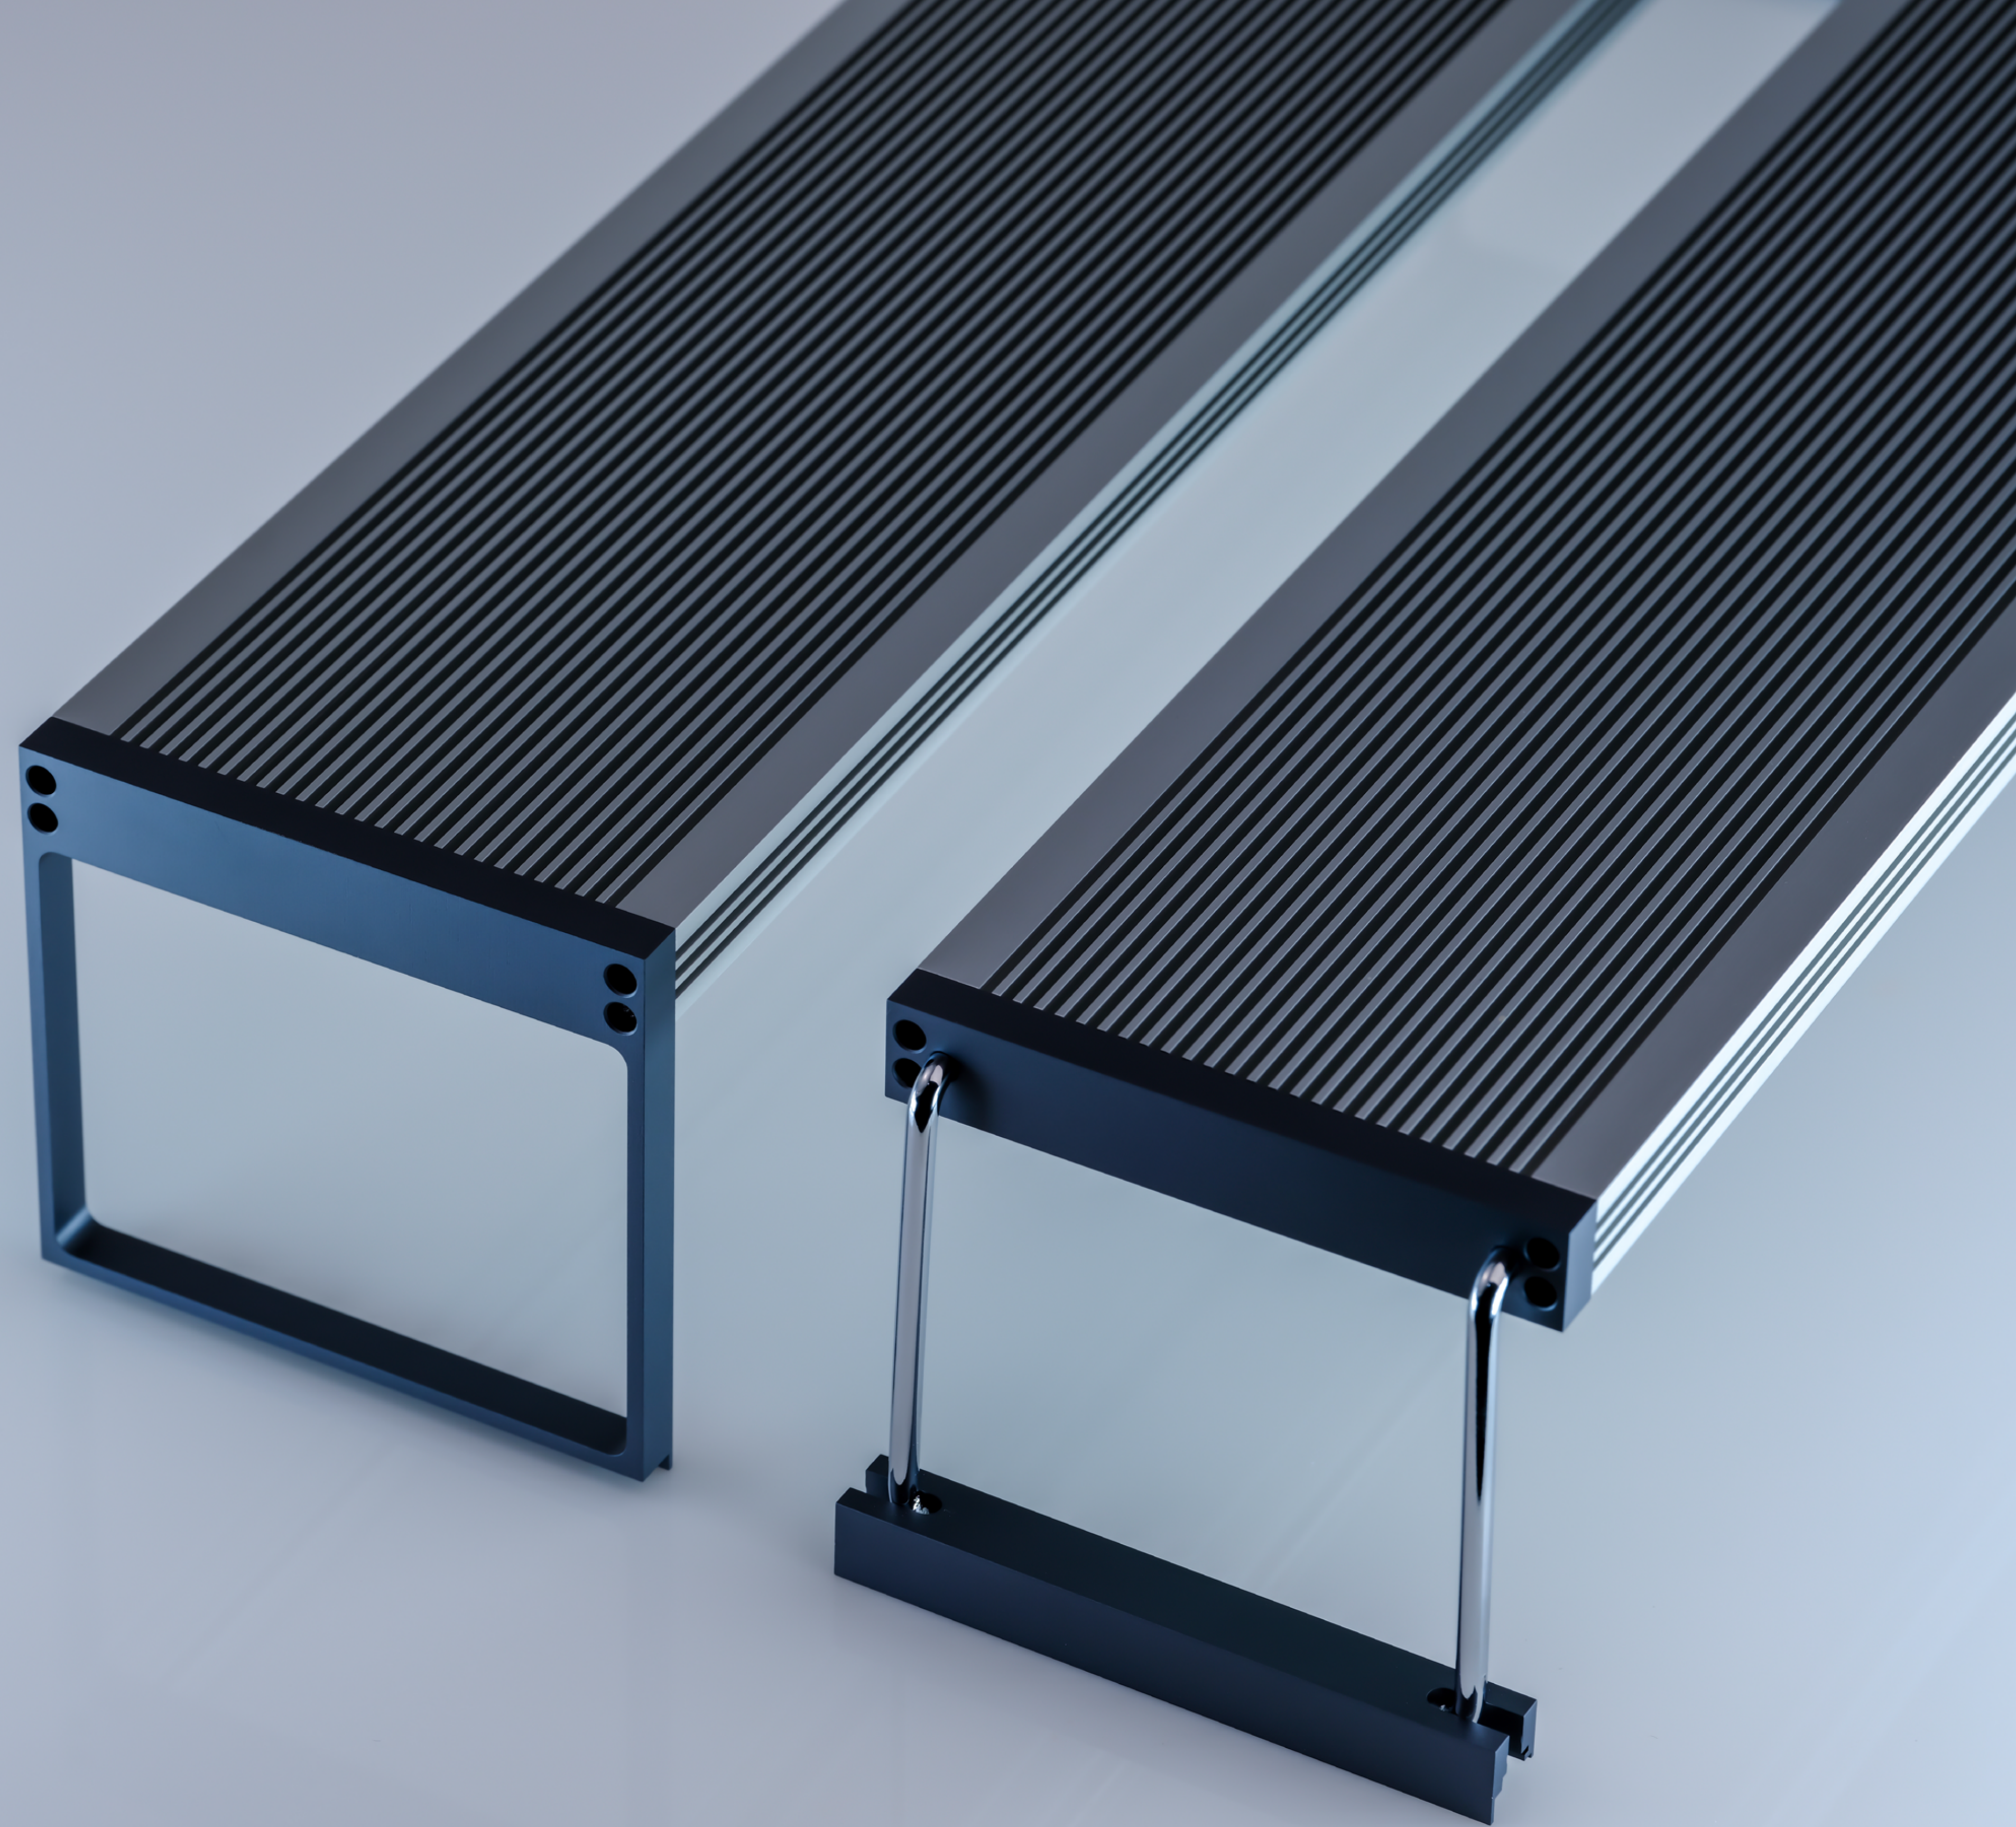

THREE DIFFERENT SIZES OF LIGHTS TO SUIT SMALL TO LARGE TANKS.

You will feel the perfect balance between the lighting and a tank when installed in a tank.

**SAME QUALITY.
DIFFERENT DESIGN.**
